

TARGETED AT:

- Transport companies.
- Professional cleaning services for commercial vehicles (refuse trucks, mine trucks, refrigerated trucks, tippers, etc.).
- Pleasure boats.
- Shipping container tanks.

BENEFIT TO BUSINESS

- Total control over consumables.
- Incorporates all the different wash solutions (disinfection, high-pressure, volume wash, acid-based pre-wash, foaming chemical pre-wash, etc.).
- Saves time (optimized use of resources).
- Option to use the system for paid business or for internal operations.

THE SOLUTION

Professional high-pressure manual wash or system to supplement professional automated wash services.

MAIN CHARACTERISTICS

- Exact control over costs:
 - Sensors
 - Connectivity (sends alerts, remote monitoring).
 - chemical product levels.
 - I.O.T.
 - Controlled dosing (biocide for disinfection and industrial chemical pre-wash).
 - Program time.

DIFFERENTIATION

- Pay per wash.
- Modular (1 or 2 bays).
- Good installation design (clear wash bay).
- Flexible configuration and installation.
- Ergonomic design for operators.

PROFITABILITY

integrated wash solutions

- complete control over costs
- saves time

+ profitability

ENHANCED USER EXPERIENCE

- Reduces noise pollution (insulated casing).
- Easy to use.
- Easily accessible.
- Environmental improvement controlled use of chemical products.
